Summary

As an experienced Front-End Developer, I specialize in crafting high-performance, pixel-perfect, and responsive web experiences. My expertise spans HTML, CSS, JavaScript (including Pure JS, jQuery, React, Svelte, SvelteKit), along with platforms like Shopify (Liquid) and Webflow.

I excel at translating intricate designs into dynamic web applications, engaging web pages, and conversion-focused landing pages. Driven by a commitment to timely delivery and continuous improvement, I thrive on solving complex UI/UX challenges and integrating cutting-edge technologies.

Actively seeking opportunities to build intuitive and impactful digital solutions. Let's connect and explore how I can contribute to your team.

Skills and Abilities

Core Technologies

HTML CSS JavaScript TypeScript

Frameworks & Libraries

Svelte/Sveltekit React React Native jQuery Vue

Styling

SASS/LESS Tailwind CSS Material UI Bootstrap

Development Tools & Platforms

Git Github Shopify/LiquidJS Webflow Asana ClickUp Trello

Experience

Piernet | Front End Developer / Shopify Developer

04/2025 - Present

- Developing dynamic and responsive interfaces using HTML, CSS, Pure JavaScript, React, NextJS, Material UI, Tailwind
- Creating and maintaining mobile applications with React Native
- Building custom Shopify storefronts with Liquid and theme development
- Integrating third-party services and APIs into Shopify and React applications

Front End Engineer - Frostium | (Project Based - Part Time)

09/2024 - Present

- Creating UI Structure of SaaS with Svelte/Sveltekit
- Developing pages from scratch with HTML, Tailwind and JavaScript
- Working with TypeScript for enhanced code reliability

Front-End Developer - Pattern Brands | Contractor

09/2022 - 11/2025

- Since September 2022, I have been contributing as a Front-End Developer, creating and enhancing web pages from scratch while optimizing user experiences. My expertise includes implementing dynamic features with JavaScript frameworks like Svelte, managing DOM manipulations with jQuery & Pure JavaScript, and ensuring seamless styling with CSS. Additionally, I've worked on event tracking using Google Tag Manager (GTM) to support data-driven insights and improve user engagement.

Front-End Developer - Novus Studio

08/2022 - 04/2025 (Full Time) & 04/2025 - 11/2025(Contractor)

- Led complete frontend development for turquia.com.tr, including business dashboard
- Developed and improved UI/UX for mayple.com using Svelte and Webflow
- Created e-commerce solutions with Shopify/Liquid for miraclebrand.co
